

### Woods Timer/50029WD Manufacturer (Southwire) Instructions

Begin with an extended paperclip to perform a hard reset (the tiny hole at the bottom of the timer). This timer is astronomical—can be programmed to come on at sunset and off at sunrise or On and Off at designated times.

NOTE: Before programming, **Refer to the map in the instruction manual—this is not your time zone. It is displayed on the timer as NOR, SOU, CEN.**

CONTINUED: Next, Google/Note your sunrise and sunset times.

The steps to programming this timer will be very fluid.

MO, 12:00 AM, and Off appear on the start-up screen.

#### Setting the clock

Quick-press SET—Quick-press (+/-) to advance to the current year.

Quick-press SET—Quick-press (+/-) to advance to the current month #.
